

Bra & Corset Accessories

-Bra Underwire Channeling

-Boning Channeling

Bra underwire channeling is top quality - thick and soft with a plush back for comfort.

We added the **thermal fuse** material and keep the casing good stretch. This casing is a proper tube to fully enclose the underwires and prevent them from rubbing against the skin and the outer bra fabric.

This channeling can also be used to corset making. For 6mm or narrow boning.

Can do the Pantone color to match your bra band elastics. Width: 3/8" (1cm). Sold by the yard.

Material	Nylon, polyester, thermal fuse
MOQ	1000 YDS for black, white and skin; 3000 YDS for pantone color
Payment Terms	TT, Bank Wire, Paypal, Western Union
